

Ball-end thrust screws without head stainless steel with full ball

Item description/product images

Description

Material:

Screw stainless steel.

Ball stainless steel, POM or ceramic Si_3N_4 .

Version:

Stainless steel bright.

Note:

Ball-end thrust screws with full ball are used when a clean, polished contact surface is required. Longer versions have been designed especially to be glued in, allowing mechanical connecting elements with external threads to be made cost-effectively for small and medium-sized runs. Silicon nitride (Si_3N_4) is characterised by a combination of excellent properties, these include high resilience and strength, excellent wear resistance and good chemical resistance.

Drawing reference:

Form A: stainless steel ball

Form D: POM ball

Form E: ceramic ball
